**Subject:** Dico Extraction Well #6 Low Flow Rate Issue Resolved

A well contractor was at Dico on Friday, May 19<sup>th</sup> and Monday, May 22<sup>nd</sup> to clean the well screen on extraction well #6. The cleaning of the well screen has been completed and the well was restarted yesterday.

The flow rate of extraction well #6 was measured today, before the groundwater extraction and treatment system was shut down, and the flow rate has increased significantly. At this point, it appears that the issue with a low flow rate at this extraction well has been resolved.
